

WEB DEVELOPMENT INTERNSHIP PROGRAM

WEEK 1 PROJECTS LIST

PROJECT I

Objective:

Create a functional and visually appealing search interface using HTML and CSS.

Project Description:

You are tasked with developing a search interface similar to the provided design. The interface should include a dropdown menu with options to select different categories (e.g., Everything, Software Development, Web Development, Data Analyst, IT Consultant, Network Administrator) and a search input field for users to enter their queries.

Key Features to Include:

Dropdown Menu:

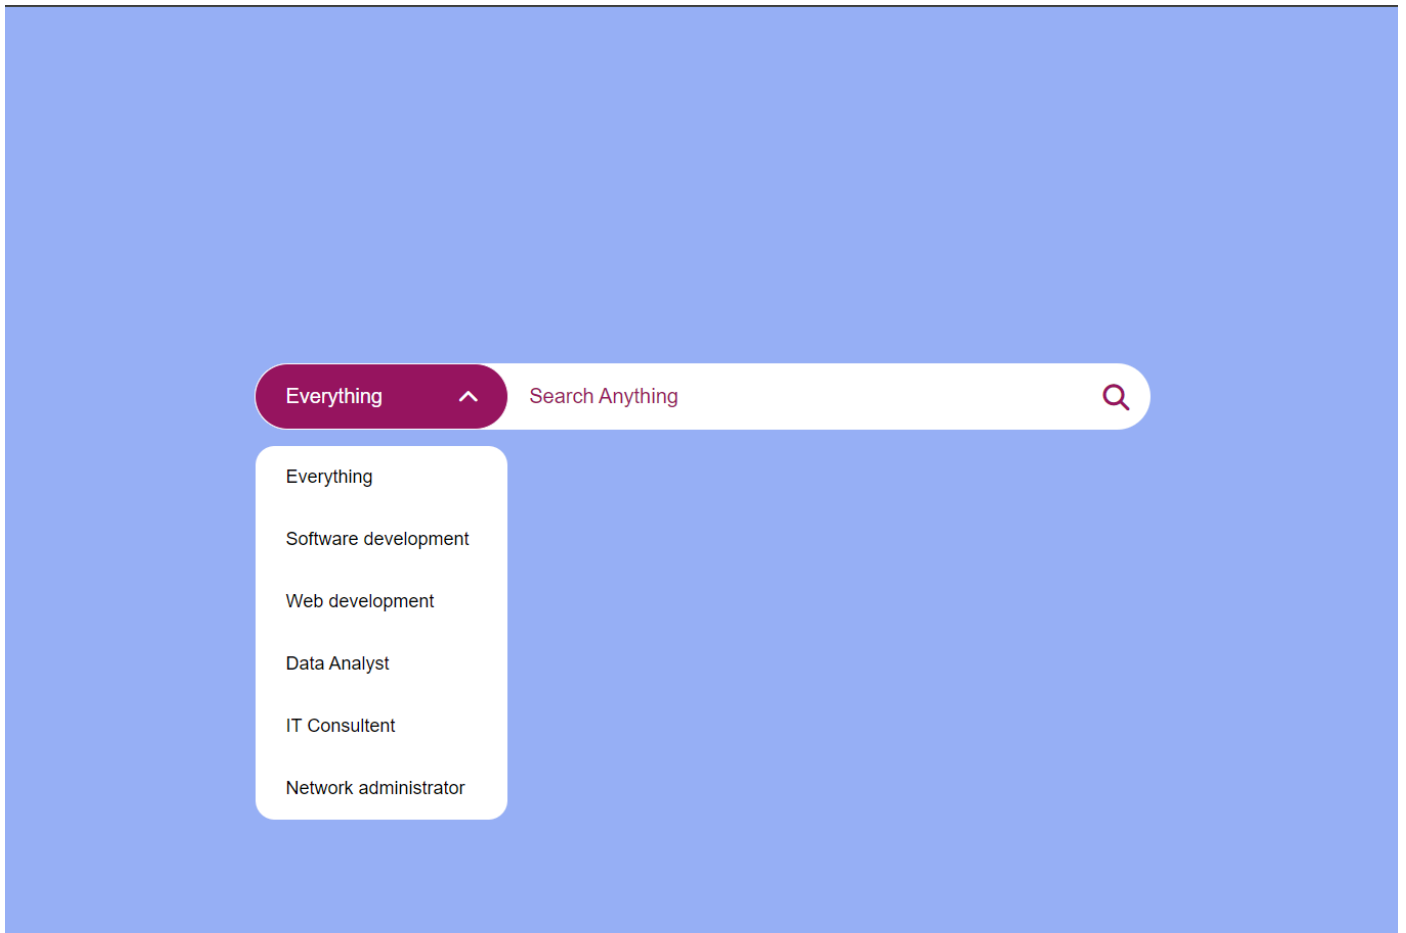

- Categories: Everything, Software Development, Web Development, Data Analyst, IT Consultant, Network Administrator.
- Dropdown should expand when clicked and collapse when a selection is made or when clicked outside the menu.

Search Input Field:

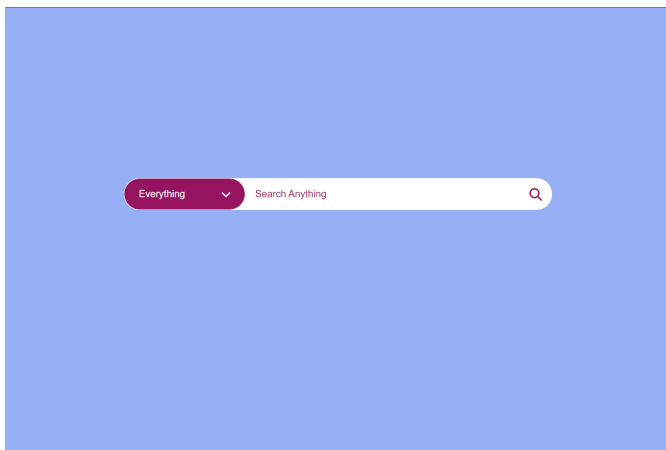

- A text input field for users to type their search queries.
- A search button to initiate the search process.

Styling:

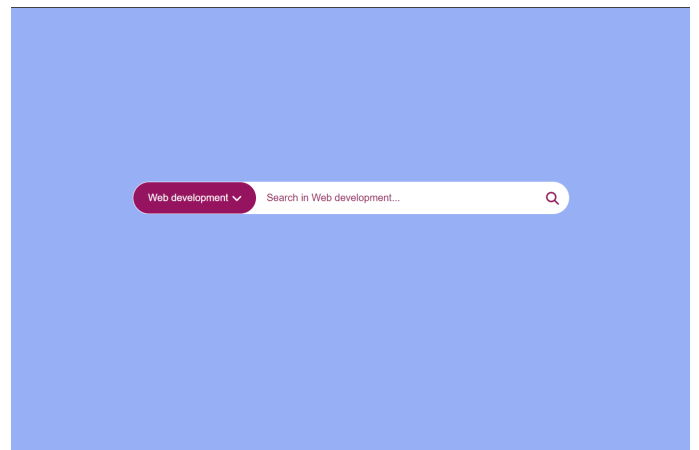

- Use CSS to style the dropdown menu, search input field, and button.
- Ensure the interface is visually appealing and user-friendly.
- Follow the design provided in the attached image for reference.

Optional Enhancement:

If any of you wish to make the UI more interactive, feel free to build on it. You can add features such as animations, transitions, or additional interactive elements to enhance user experience.

Technologies to Use:

- HTML for structuring the content.

- CSS for styling the interface.

Additional Notes:

- Ensure the design is responsive and works well on different screen sizes.
- Pay attention to detail and aim for a clean, modern look.

PROJECT II

Objective:

The objective of this project is to create an engaging and visually appealing **"Animated Login Form"** using HTML and CSS. The goal is to enhance your skills in front-end development and design by incorporating animations and interactive elements into a basic login form.

Project Description:

You will be tasked with designing and developing an animated login form that is both functional and aesthetically pleasing. The form should include fields for username and password, along with buttons for login, forget password, and signup. The focus will be on utilizing CSS animations and transitions to create a dynamic user experience.

Key Features to Include:

HTML Structure:

- Create a basic HTML structure for the login form.
- Include fields for "Username" and "Password".
- Add buttons for "Login", "Forget Password", and "Signup".

CSS Styling:

- Style the form to make it visually appealing.
- Use CSS to create animations and transitions for the form elements.
- Ensure the form is responsive and looks good on different screen sizes.

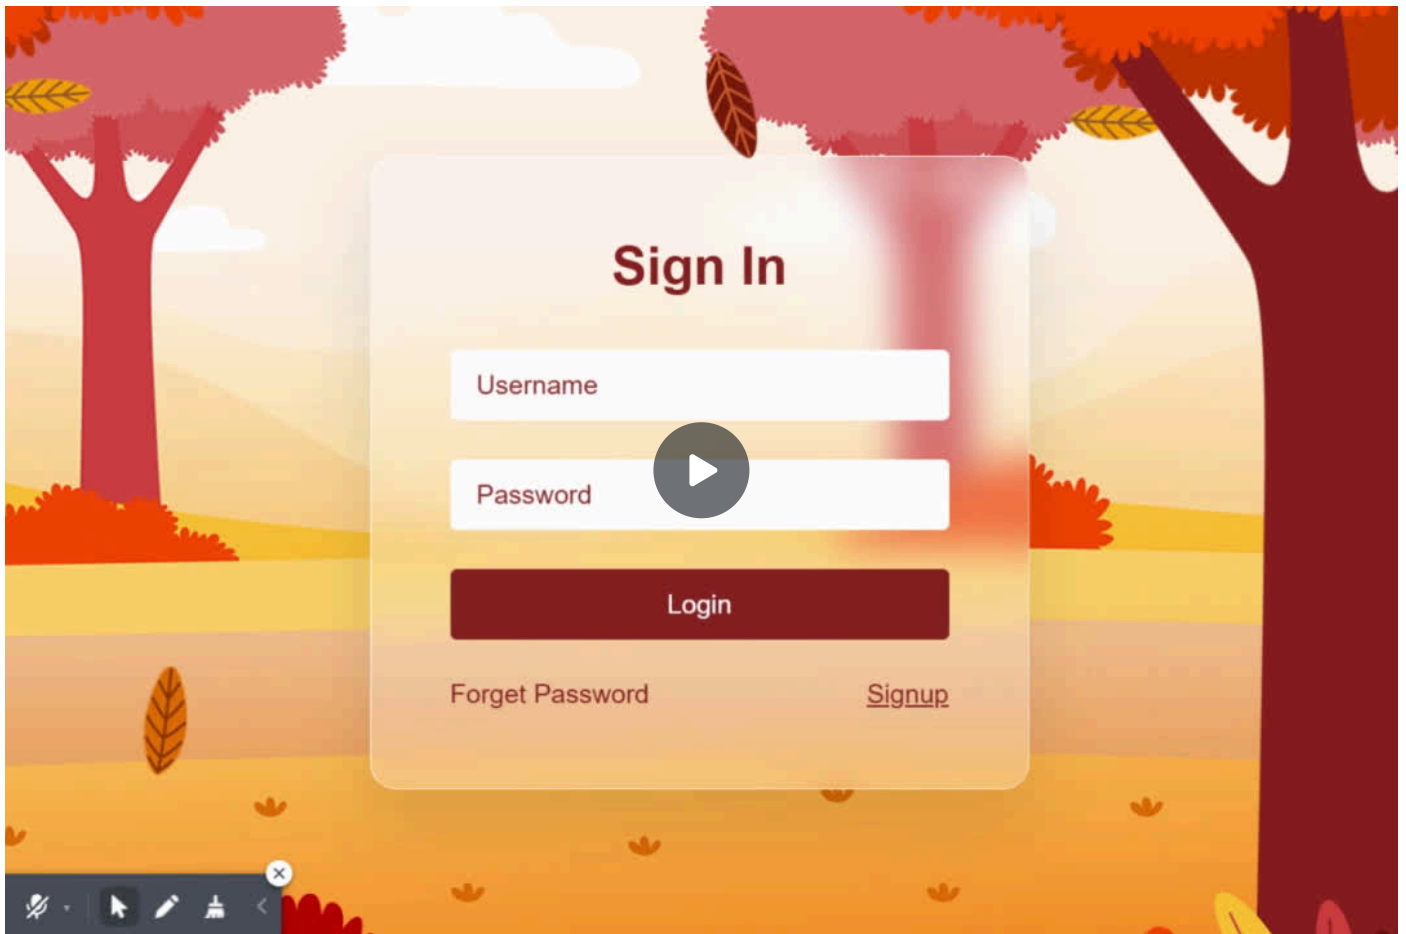

Background and Theme:

- Design a background similar to the one in the provided image, with an animated or static illustration.
- Use colors and styles that complement the background and make the form stand out.

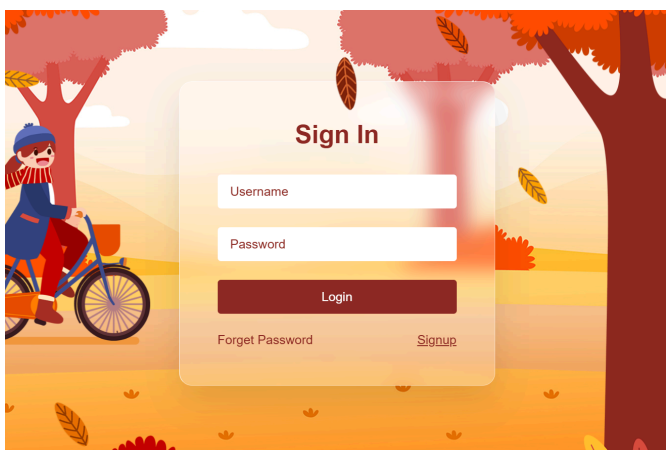

Interactivity:

- Add hover effects and transitions to the form elements to enhance user interaction.

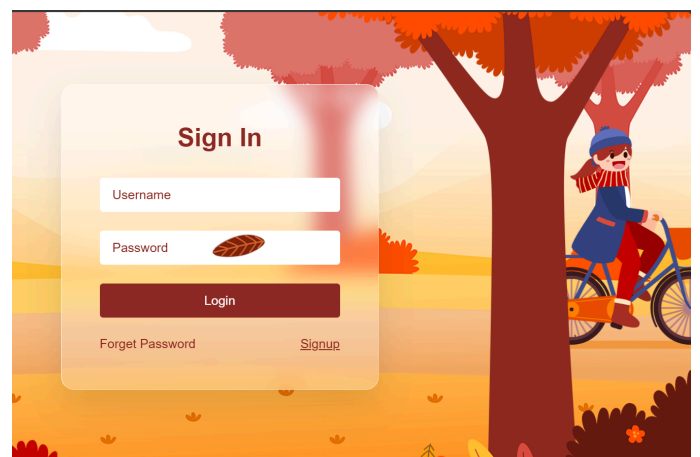

- If you want to make the UI more interactive, feel free to add additional animations or interactive elements.

Sample Project Image 2

Technologies to Use:

- **HTML:** For the structure of the login form.
- **CSS:** For styling, animations, and responsiveness.

Additional Notes:

- Ensure the design is responsive and works well on different screen sizes.
- Pay attention to detail and aim for a clean, modern look.
